

THE ROOTED HEART

AUGUST 13, 2026

While flying through the city, I noticed someone standing alone on a rooftop.

They looked ordinary—but a dream download told me they possessed an extraordinary power.

I asked whether they were a superhero.

They were startled because their ordinary form protected a secret identity.

Then they admitted that I was right.

The hero grew hairs from their body and formed colorful balloons at the tips.

They covered themselves in fur until they looked like a friendly Sasquatch.

Their voice and body seemed to shift from masculine to feminine.

A long hair whip let them swing between buildings.

A balloon from their back lifted them while the whip steered their flight.

The hero
rooted one
detached hair
into a building.

Then they
unrooted the
entire structure
and lifted it
beneath an
enormous balloon.

I feared the
plumbing, electricity,
and foundations
had been
torn apart.

But rerooting
restored every
connection
perfectly.

What looked
destructive was
completely
reversible.

Next,
the hero
unrooted
the entire
city.

One
colossal
balloon
carried
every street
and tower
into the sky.

They
rerooted
it without
leaving any
damage.

The authorities
demanded proof
that such frightening
power truly helped
people.

I vouched for
the hero because
I believed their
heart was in
the right place.

At the hospital, the hero revealed how they normally used their gift.

Covered in soft fur, they visited children who needed hope.

Balloon-tipped hairs filled the room with color.

The children were delighted that a friendly Sasquatch had come to entertain them.

Their strangest form had become a source of comfort.

The hero's most extraordinary work involved organ transplants.

They could unroot a failing heart without pain or blood.

A viable donor heart could take its place perfectly.

The same power that restored buildings restored the patient.

A dangerous surgery became a seamless act of healing.

Someone capable of lifting a city could have chased battles, fame, or fear.

If they were cruel, their unrooting power could cause unimaginable destruction.

Instead, they chose hospitals, children, and lives in need.

Their power seemed bizarre and frightening only until I understood its purpose.

The greatest thing they lifted was not a city—it was hope.
