

07/07/2026: Super Wizard Brain Cleaning

Sleep paralysis made me lucid, and the Storyverse dropped me into Salem alone.

The town was trapped in the fear of the witch trials.

An angry crowd had tied a wizard superhero to a burning stake.

His name was Super Wizard Man, and he was trying to help people with magic.

If I waited, Salem would burn a hero before anyone understood what he was.

I threw my golden tether into the sky and caught the edge of a storm cloud.

Then I pulled the cloud down until it hung right above the fire.

Rain crashed over the stake and swallowed the flames.

Thunder and sudden darkness scared the mob away from the square.

Super Wizard Man was alive, so we ran before Salem found new courage.

Super Wizard Man led me through a trapdoor into his hidden underground lair.

The lair was part wizard workshop and part superhero headquarters.

He showed me the secret that had changed his life.

He had found a comic from the future.

That comic taught him that a person with strange powers could become a hero.

I told him that helping people with magic was a good thing.

But Salem did not know what superheroes were yet.

To them, a wizard saving lives still looked like something dangerous.

Super Wizard Man understood, but he did not want to stop helping.

I hoped he could find a safer way to make a difference.

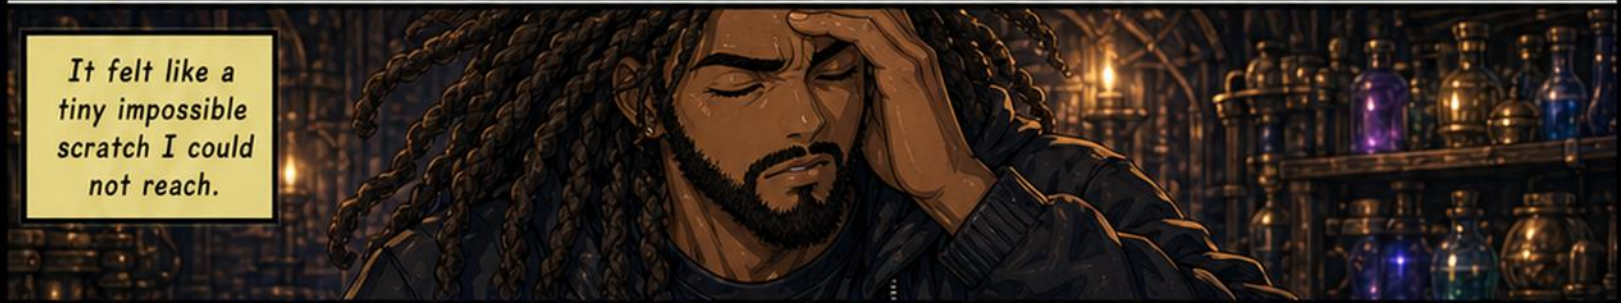

Then I felt
a weird itch
deep inside
my brain.

It was not
pain, and it
was not a
normal thought.

It felt like a
tiny impossible
scratch I could
not reach.

Super Wizard
Man knew
exactly what
to do.

He summoned
a mystical
salon chair in
the middle of
the lair.

He invited me
to sit down
for a brain
cleaning.

The cleaning was stranger than anything I had ever felt.

He scratched the itch with tiny star-shaped magic combs.

He brushed my brain with soft blue light.

He scrubbed away the uncomfortable sparks without hurting me.

Then he washed everything in warm glittering water.

The itch finally loosened and faded.

When the
cleaning ended,
my brain felt
calm again.

It was unusual,
but deeply
relaxing.

Super Wizard Man
had saved me
after I saved him.

I hope he survives
until his time can
understand him.
