

07/04/2026:
REALITY
SICKNESS
REBOOT

Sleep paralysis opened the lucid gate, and I entered the Storyverse already in danger.

Vampiric dark elves attacked Johnson and me before the real adventure began.

One bite split Johnson's fate between rescue and infection.

I cast Solvo, separating normal Johnson from his red vampire form.

Then Aegis held vampire Johnson back while we escaped.

I did not
stay lucid.

The dream recast
me as a young
janitor boy cleaning
after an old cook.

Her kitchen was
full of strange
glowing blue grapes.

When she used
something unclean,
reality itself
became sick.

The sickness spread beyond the kitchen.

Places and timelines patched together like torn cloth.

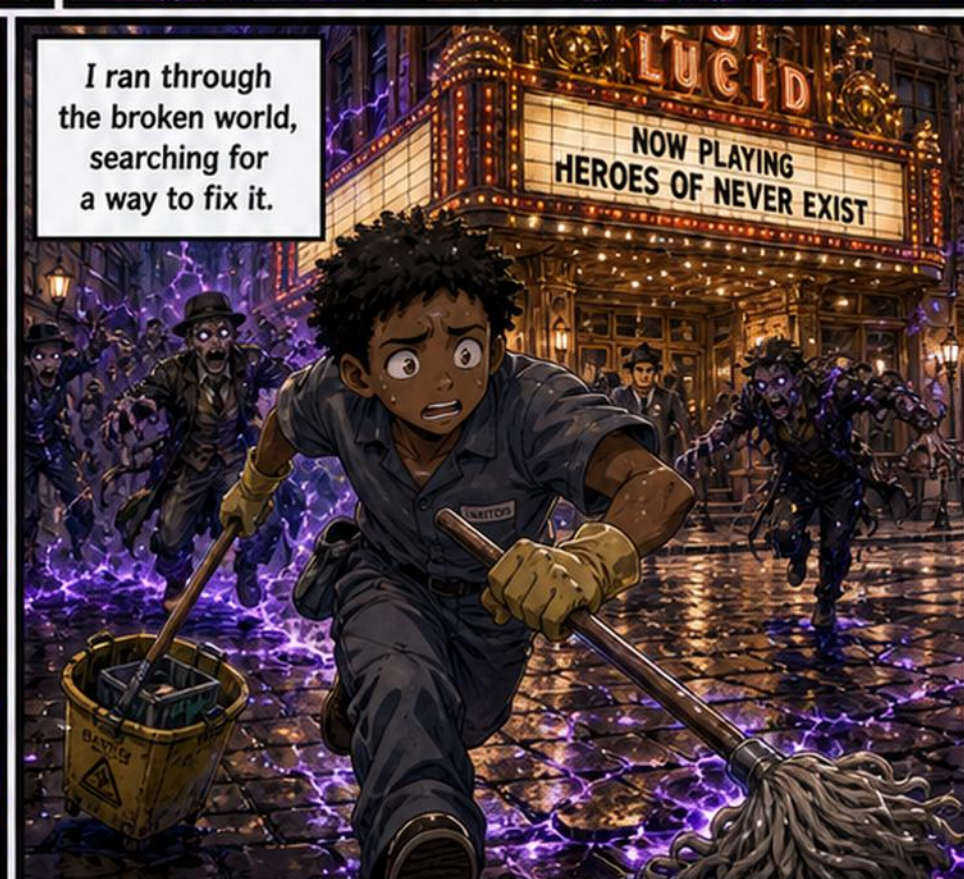

People twisted into monstrous versions of themselves.

I stayed unchanged, which made me the obvious target.

I ran through the broken world, searching for a way to fix it.

The chase
forced me into a
1920s theater.

On the screen, a
superhero film was
playing decades
too early.

That impossible
detail woke my
lucidity back up.

I remembered
I was Jet.

I transformed into
the hero the dream
had been showing me.

My new
power was
clear.

I could fly
by blasting
energy balls
at the ground.

Every blast
launched me
higher through
the broken sky.

A villain chased
me because he
loved the
monstrous world.

He wanted
the sickness
to stay.

I had to reach
the reboot
remote before
he did.

I outraced him
by using the blasts
like stepping stones
in the air.

I grabbed
the reboot
remote first.

The pursuer
searched the
corrupted streets.

I hid where the
sick timelines
crossed.

Then I pressed
the reset button
and chose a
healthy reality.

The reboot wave
cleaned the sickness
from reality.

The patched places
separated into one
steady world.

The monsters became
ordinary people again.

Then I had a false
awakening as the
janitor boy.

The repaired world was
peaceful, but the adventure
stayed in my memory.
